E40S PRODUCT MODEL

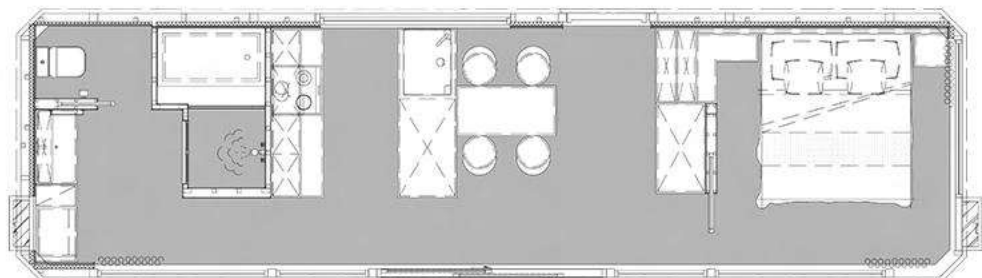

11.5m*3.3m*3.3m

/ Area covered: 37.95m²

The E40S model product is an extended high-end version of the E40 model. This product breaks down the barriers between space capsule house hotels and space capsule house residences, replacing the previous hotel homestay layout with a long-term livable layout design. It integrates various details such as three separation bathroom and outdoor water and charge ports, and selects world-renowned brands for furniture and home appliance configurations. The purpose is to create a high-end space capsule house product that is truly suitable for long-term living.

T30 PRODUCT MODEL

8.5m*3.3m*3.3m

/ Area covered: 28.05m²

The T30 model product is the best-selling style in the T series. Drawing inspiration from the design of spacecraft, the diamond shaped shell and angular border give it a futuristic feel. The interior adopts a classic space capsule house homestay hotel king bed layout, with a 270 ° viewing windows and panoramic sunroof. The outdoor is equipped with a super large viewing terrace, allowing customers to have a panoramic view of the starry sky and beautiful scenery no matter where they are.

T40PF PRODUCT MODEL

/ L*W*H: 11.49m*3.3m*3.3m

/ Area covered: 37.92m²

The T40PF model product is the top of the line version of the T40 flagship expansion. The appearance retains the T-series spaceship style window design and combines with the horizontal layout scheme of the E-series enclosed rear wall. The kitchen, dining room, living room, and bedroom have been designed, and the horizontal layout of the enclosed back wall can also reasonably arrange more functional areas. The layout of kitchen and bedroom make it more comfortable to use. It is a flagship expansion product that combines cool appearance, reasonable layout, convenient use, and comfortable living.

PRODUCT STANDARD CONFIGURATION

STANDARD CONFIGURATION

- Anti seismic hot-dip galvanized steel structural system
- Multi layer thermal insulation structural system
- Standard color custom aluminum outer panel cladding
- Customized aluminum ceiling panels in standard colors
- Standard color custom interior decorative wall/ceiling panels
- Standard color custom interior cabinet
- Top Brand high-end bathroom fixtures
- Top Brand water pipes and circuit main material construction system
- Whole house HVAC+water heater
- Whole house electric track+sunshade
- Whole house lighting+indoor and outdoor ambient lighting
- Aluminum alloy door and windows system
hollow low-e tempered glass curtain wall structure
- Thermal insulation and fireproof entrance door
intelligent access control

OPTIONAL

- Intelligent voice control system (CHINA)
- Underfloor heating system
- Fresh air system
- Solar power supply system
- Exclusive customized layout plan

The entire series is equipped with floor to ceiling observation windows ranging from 180 ° to 360 °,
Experience being awakened by the chirping of insects and birds, and open the curtains then you can see the jungle trees,
Experience a dreamlike living experience through mountains and rivers.

Customized intelligent panels,
Dual control linkage, lighting, curtains
All functions are easily accessible with just one touch.

The indoor area is equipped with lighting and ambient virtual light,
Using lights with different color temperatures to cope with different usage environments,
Combined with the sunlight or starry sky after the panoramic sunroof is opened,
Create a warm and romantic lighting environment.

The top space can be integrated with air conditioning units, bathroom heaters, and exhaust equipment rooms,
Concealed installation with reserved maintenance openings,
Convenient for daily maintenance without affecting overall aesthetics.

One click lifting hidden projection screen,
One click high-definition projection opens the cinema level audio-visual journey inside the space capsule house.

All models have high-end top brand bathrooms,
Dry and wet separation design, comfortable layout,
Experience the pleasure brought by quality living.

Spacious flat space with customizable soft furnishings,
Set it as various desired areas,
Free exploration of various combinations and expandability.

Some models are equipped with kitchen space,
Customizable increase/decrease of various kitchen utensils,
Meet the dining and cooking needs from mild use to long-term residence,
Free to feel the earthly lives on the journey.

PRODUCT STANDARD STRUCTURE

The aviation aluminum shell adopts laser welding, with high processing accuracy and small deformation, Tight assembly and high compatibility with steel structures. Install with multiple fixed points to reduce contact area and ensure bottom thermal conductivity, The internal connection is equipped with insulation sealing strips, which are fully sealed with multiple waterproof layers.

Yitong customized steel structure installation framework, Different models of equipment are designed and constructed separately based on the different types of aluminum shed, Realize fast and accurate installation, with high strength, stability, and adhesion.

Yitong provides glass technology solutions of different specifications, Provide different glass curtain wall landing solutions for regions with different climates, The premise of ensuring functionality is to also enjoy a super large landscape view.

The bottom steel structure is made of thickened hot-dip galvanized steel, The high-density layout ensures the structural stability of the chassis. The bottom gap is the construction space for the insulation layer, Thickened insulation layer covers and isolates the steel structure from direct contact with cold air. Ensure the cold resistance and thermal insulation performance of the equipment.

For customized space capsule house with heating needs, Yitong will distribute and heat underfloor heating according to the local minimum temperature, Various solutions such as electric heating water circulation underfloor heating, To ensure the indoor operating temperature of equipment in extremely cold areas.

CORE ADVANTAGES

Module prefabrication,
Integrated production,
Product quality assurance.

Low energy consumption,
Environmental friendly sewage,
No damage to the environment.

Movable,
Without hardening the ground,
Convenient and quick installation.

Various specifications are available
famous brand supporting.

Exquisite decoration,
Intelligent system,
Fully furnished and ready to move in.

Controllable investment ,
considerable income,
Short cycle, big return.

TRANSPORTATION AND INSTALLATION

TRANSPORTATION PHASE

The standard truck is a semi-trailer with a length of 17.5m, a transportation width of 3m, and a transportation height of no more than 4.2m. It can freely pass through national highways.

LIFTING STAGE

After the goods arrive at the site, the customer needs to contact the local crane service on their own, and our technical team will provide installation guidance.
The lifting weight of ETONG's entire series of products ranges from 6 to 10 tons. It is recommended to use a crane of no less than 25 tons for loading and unloading.

INSTALLATION

Before installing the product, the customer needs to complete the on-site engineering of water supply, power supply, sewage pipelines, and load-bearing foundations according to our ETONG product standard basic water and electricity drawings.
Under the guidance of our technicians, accurately locate the installation point in the design, connect the water and electricity, and complete the water and electricity test.
